## Profile

I am a technical engineer in the software industry with 5 years of experience.

I have experience working with APIs of various CRM and HelpDesk systems.

I have considerable experience working with Hubspot CRM system. I performed configuration of client HubSpot CRM (configuration of fields and custom objects), transferred data from other CRM systems to HubSpot and modified them accordingly to Hubspot structures, configured workflows, created connectors and adapters for CRUD operations for HubSpot through its API.

I also have experience in developing full-stack applications on PHP, REACT. You can see them here <https://andrmo96.blogspot.com/>
